7 years designing complex B2B products: fintech, banking CRM, enterprise logistics, healthcare and e-commerce. I treat the design system as a product in its own right, map the problem space before any design work begins, and stay close to engineers, PMs, POs and BAs until it ships. I write front-end code myself and build tools that remove the repetitive parts of design work.

EXPERIENCE

2023 — 2026	Senior Product Designer · TMA Solutions (enterprise software outsourcing) Led product design across concurrent enterprise projects in fintech, healthcare and logistics. A system-first approach kept quality consistent from one engagement to the next instead of rebuilding each time.
2023	Product Designer · CyberLogitec (enterprise logistics software) Led design direction in the product team, turning dense operational workflows into role-specific interfaces.
2021 — 2023	UI/UX Designer · Aperia Solutions (banking and fintech CRM) Owned the UX across product pages and core workflows, maintained the design system in Figma, and worked with POs and BAs through delivery.
2020 — 2021	Product Designer · FireGroup Technology (TrueProfit, a Shopify profit analytics app) Led end-to-end design from research and prototyping to handoff. Built and owned the core design library, working directly with engineers on implementation accuracy.
2019 — 2020	UI/UX Designer · Conceptual Studio (design studio) E-commerce, mobile and web projects, covering UX flows and visual production. Built UI kits and WordPress themes used in-house and sold on the market.
2019	UI/UX Design Intern · Kyanon Digital (digital agency)

SKILLS

Design	Product design · UX design · Mobile and web UI · Design systems and tokens
Product	Business analysis · Product ownership · Shape Up and agile delivery · Lean principles
Engineering	Front-end engineering · AI-assisted workflows
Tools	Figma · Storybook · React · TypeScript · TailwindCSS

COMMUNITY AND OPEN SOURCE

Free Figma templates with 104k uses on Figma Community, plus a published Figma AI skill. Open-source maintainer of Zweihänder, a React UI kit, and Moonveil Icons, an SVG icon library.
