7 years designing complex B2B products in fintech, banking CRM, enterprise logistics and healthcare. I map the problem space before drawing screens, treat the design system as a product, and stay with engineers, PMs, POs and BAs until release. I also write front-end code and build design tools.

EXPERIENCE

2023 — 2026	**Senior Product Designer** · TMA Solutions (enterprise software outsourcing) Led product design across concurrent enterprise projects in fintech, healthcare and logistics. A system-first approach kept quality consistent from one engagement to the next instead of rebuilding each time.
2023	**Product Designer** · CyberLogitec (enterprise logistics software) Led design direction in the product team, turning dense operational workflows into role-specific interfaces.
2021 — 2023	**UI/UX Designer** · Aperia Solutions (banking and fintech CRM) Owned the UX across product pages and core workflows, maintained the design system in Figma, and worked with POs and BAs through delivery.
2020 — 2021	**Product Designer** · FireGroup Technology (TrueProfit, a Shopify profit analytics app) Led end-to-end design from research and prototyping to handoff. Built and owned the core design library, working directly with engineers on implementation accuracy.
2019 — 2020	**UI/UX Designer** · Conceptual Studio (design studio)
2019	**UI/UX Design Intern** · Kyanon Digital (digital agency)

SKILLS

Domains	Fintech · Banking · Real estate · ERP · SaaS · System · Social · E-commerce · Healthcare · Accounting · IoT · Logistics
Designed	Design resources · Design systems · Mobile apps · Domain systems · Landing pages
